Laboratory Facilities

Computer Laboratory

The College has a separate computer laboratory with appropriate hardware and software to provide training to the student-teachers. The lab provided wide scope for the self-study courses. With the help of computer labs, student teachers can access a wide range of online learning resources such as e-books, videos, online courses, and other study materials. This can make it easier for students to research and find additional materials that can help them better understand the course material.

Student utilise Computer Lab for Self Study Course

STEM Lab

The STEM lab offers a vast range of opportunities for students pursuing self-study courses. It provides them with ample room for exploration, experimentation, and practical application of their knowledge. With the lab's resources and facilities, students can expand their horizons, delve deeper into their areas of interest, and develop their skills and abilities. Additionally, the lab's collaborative and team-oriented environment allows students to enhance their communication and interpersonal skills while working with others toward a common goal. Therefore, the STEM lab is an excellent asset for students pursuing self-study, enabling them to broaden their understanding, improve their skills, and excel in their academic and professional endeavors.
