RAIN WATER HARVESTING

Water management has become the need of the hour as climatic changes have become a threat to the present generation. In an attempt to preserve water, the college has facilitated collection and storage of rain water. The rainwater harvesting system is available in the college and hostel buildings. The rain water from the college building is connected to the rain water harvesting pit. It helps to maintain the ground water level.

RESERVOIRS/ TANKS/ BORE WELLS

The institution is using tanks for clean water storage and water distribution system in the campus. Town Panjayath water, water from bore wells are collected and stored in the water tanks. The water from the tank is distributed to Water Doctor. Thus, the institution saves water and reduces water scarcity.

ECONOMICAL USAGE /REDUCED WASTAGE

The institute ensures that the water wastage is minimised at an optional level. The pipe lines are under regular check; hence no loss of water is observed by any leakages. Overflow of water from overhead tanks are monitored and water wastage is reduced. For the economical usage of water, the outlet water from the Water Doctor, waste water from the wash basins and waste water from the hostel bathrooms are directed to the garden. To follow economical usage of water in its campus, the institution has sent Conservation Notice to the faculty and student teachers follow economical usage of water in the institution, their home and society.
